Download cover

Support - General

Hello, has anyone had any difficulties with the cover downloader. I'm on night version 2.1.35.

It's weird it shows that they are downloading but cover folder is empty. I thought perhaps the serial for the games were an issue but it does seem to me it's picking them up on the downloader.

Any thought? Am I missing something obvious? It's not updated any of the games. I manually did one to make sure it was working.

One is flat pictures, the other is 3D

So the one that looks exactly like has been drawing on the paper, and the other is a 3D covers for the games, right.

Yup, the 3d one looks like the PS1 jewel case.

Edit: PS2 DVD case

I've used that one on my ps1 emulator, but I have no luck with the latest version of the emulator.

Sorry, I meant PS2 DVD case. Hmm, I used the cover system on both Duck Station and PCSX2 and didn't have any problems. Of course my PCSX2 is still a nightly 1.7+ build. I'm not with my main computer currently so I haven't tried 2.0 yet.

I just manually set all my covers

Im not using the Cover Download tool at all.

Right click on the Game> select Cover and choose the picture you previously downloaded.

Its the fastest way for me.

I would honestly just download the covers from Google and apply them manually. I couldn't figure out how to use that feature

The feature is really helpful, but it also tends to use some low quality camera pics taken of the cover.

I'd recommend using it and then replacing the few covers it used bad pics for.

When in PCSX2, go to tools -> cover downloader and put in this link

I highly recommend y'all download the cover downloader from here: <https://github.com/xlenore/psx-covers>

Can also be used with Duckstation too.
